(54) Title: **ELECTROCHROMIC DISPLAY PANEL WITH ELECTRODES FOR ADJUSTING CROSSTALK**

(57) Abstract: The display panel (1) has multiple picture elements (2), each picture element (2) having respective neighboring picture elements (2'). The picture elements (2) have a first electrode (3) and a second electrode (4) for the application of a potential difference between the first and the second electrode (3,4), and electrochromic material (5), which is present between the first and the second electrode (3,4). Electrical charge contained by the electrochromic material (5), induced by the potential difference, determines the color of the picture element (2). Color changes are provided by varying the electrical charge. Crosstalk, being coloration of neighboring picture elements (2') when a picture element (2) is addressed, is adjustable by third electrodes (6) which adjust electrical currents between the picture element (2) addressed and their respective neighboring picture elements (2').

INTERNATIONAL SEARCH REPORT

International Application No.

PCT/IB 03/02628

A. CLASSIFICATION OF SUBJECT MATTER
IPC 7 G02F1/155

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC 7 G02F

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the International search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

* Special categories of cited documents:

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *G* document member of the same patent family
